

Greatland Laser

safety and rescue products

Brave any adventure

NEW DAY
a new day is dawning . . .

Providing patented, proven, and life tested emergency laser signaling devices throughout the world since 2001

The Ultimate Survival Tool for Outdoor Adventurers

This compact, lightweight, hand-held signal device produces a highly visible expanding line of laser light to safely and securely reveal your location to aircraft and rescuers

Greatland Laser was built with family in mind. And so, our focus has always been, and always will be, on safety – be it personal, industrial, military, marine or aviation. In a search and rescue situation, being seen can mean the difference between life and death. We are proud to offer a product that dramatically increases your odds of survival and is why we believe and always say; “Always be prepared. Always be found. Always come home.”

Our rescue-signaling device is like no other. We are proud to say, in over two decades of developing and selling these unique devices we have never had a safety issue. Hand-held models, the size of a small flashlight, project laser light through a special lens that can be seen up to 30 miles. The patented technology converts a point of laser light into an expanding line of light with much higher visibility than traditional signaling devices. Experience why outdoor enthusiasts and professionals the world over have come to rely on this ultimate personal survival tool.

2/3rd scale

Green Rescue Laser Flare®
SKU: GLF032-01

Includes a SIGHT RING to help aim at your target!

*Federal Law allows an EXCEPTION for laser emergency signaling devices to send a distress signal to aircraft.

Green Rescue Laser Flare® - The Ultimate Survival Tool

This compact, lightweight, hand-held signal device produces a highly visible expanding line of laser light to safely and securely reveal your location to aircraft and rescuers

The Green Rescue Laser Flare® is a hand-held day and nighttime laser signaling device that provides a convenient, effective way to signal a rescue party. Its waterproof, rugged design combines the safety of a laser signaling device with the convenience of a flashlight. Brilliant green light makes it the most visible of the three models and the preferred style of Search and Rescue (SAR) professionals. Unlike pyrotechnic flares, the Green Rescue Laser Flare® is non-flammable, environmentally safe and can operate continuously for 5 hours on a single long-life replaceable lithium battery.

actual size

Product Specifications: Green

- Visibility: 30 miles (48 km) nighttime, optimum conditions
- Daytime signaling up to 1-5 miles (1.6 - 8 km)
- Waterproof: to 80 feet (24 m)
- Laser Diode: Green; 532nm wavelength; 5,000 hours meantime life
- Laser Class: 3R < 5mW
- Operating temperature: 15° C ~ 45° C
- Operational Life: 5 hours continuous use before changing battery
- Battery: Single CR123 lithium battery
- Non-flammable, environmentally friendly
- Compact and lightweight, only 4.7 long and 3.3 oz.
- Rugged anodized aluminum, corrosion resistant
- 180-day Warranty – see website for details
- Lanyard hole in end cap for attachment to a lanyard or key ring

*Federal Law allows an EXCEPTION for laser emergency signaling devices to send a distress signal to aircraft.
